

John Jose | Software Engineer | JavaScript

Email : [Jon Jos](#) | [Medium](#) | [Github](#) | [LinkedIn](#) | [Website](#)

About Me

I am a problem solver with two plus years of hands-on experience in software development, dedicated to building innovative solutions and enhancing user experiences. I have strong knowledge of the Blockchain ecosystem and expertise in JavaScript development.

I possess excellent communication skills and thrive both independently and as part of a team, often requiring limited supervision. My proactive, team-oriented approach ensures that I collaborate well with others while remaining focused on achieving individual goals. I am eager to learn and stay updated with evolving technologies.

Open Source Contributions

Public Lab: [Link](#)

Hyperledger Fabric: [Link](#)

Professional Background

Sadhanapadha 2025-2026 and Sadhana Intensive 2026 [Department: SP(OTN & Global Media) and SI(VCD Tech)]

- Designed, developed, and tested the “9 to 9 Silence” feature across Poornanga App and Poornanga Admin App
- Implemented and enforced application security standards across Poornanga App and Admin platforms
- Developed accommodation request functionality for Poornanga App and Poornanga Accommodations App
- Delivered UI/UX enhancements to improve usability and user experience across Poornanga App and Admin App
- Built and deployed automation bots for reminders, notifications, and application updates
- Created and maintained automation scripts to streamline internal operational workflows
- Fixed logical errors in AppSheet expressions and resolved data integrity issues in the Social Media League app

Associate Software Engineer | DgVerse Infotech LLP - 7 Month

- Added and shipped new features to the credential platform ([DgVerse](#))
 - Built frontend features (landing page) using HTML, CSS, TypeScript, Material UI, and Fabric.js
 - Developed an interactive credential editor (canvas-based rendering, object manipulation, template customization)
 - Implemented individual and batch minting workflows (Template Wizard, Excel upload, ZIP ingestion)
 - Integrated [HashPack](#) for NFT credential minting and user signing
 - Engineered end-to-end NFT lifecycle features:
 - Email notifications for users to claim credentials
 - Secure claim flow (wallet connect + ownership assignment)
 - Transfer of credentials (NFTs) between users (Admin to General User)
 - Real-time transfer notifications to stakeholders via mail
 - Public verification of credentials via unique links
 - Metadata storage via IPFS(Pinata) and on-chain reference linking
 - Support for revocation / status updates (if applicable)
 - Delivered complete flow: issuance → claim → wallet ownership → transfer → verification
 - Live Product Demonstration (Feature Workflows): [DgVerse Credential Minting Workflows](#)

Software Engineer Intern | DgVerse Infotech LLP - 5 Months

- Tested React-based credential tokenization platform ([Dgverse.in](#)) across core workflows
- Built end-to-end test suites using Cypress [Link](#)
- Developed, tested with Insomnia and documented 15+ API endpoints [Link](#)
- Authored technical and product articles in LinkedIn [Link](#)

Blockchain Intern | Tosh Innovations (Blockchain Council) - 1 Year & 9 Months

- Developed:
 - Supply Chain Management Application using Hyperledger Fabric, HTML, CSS, JavaScript (POC): [Link](#)
 - Micro-services in Nodejs [Link](#)
 - Prototype Apps with Express, Node.js, and Reactjs
 - Image Galleries, Password Strength Evaluator, Auto Scrolling Pages, Bookmark Manager, To Do List [Link](#), E-commerce Applications, Weather App [Link](#), Tic-Tac-Toe [Link](#)
- Co-created:
 - Certified-Hyperledger-Developer [Link](#)
 - Certified-Blockchain-Developer [Link](#)
 - Certified-Javascript-Developer [Link](#)
 - Certified-Prompt-Engineer [Link](#)
 - Certified-React-Developer [Link](#)

Projects

Selected Projects (Front End)

E-Commerce Application : ProShop (MERN)

Built using : *ReactJs, ExpressJs, NodeJs, MongoDB* [Link](#)

Avatar Fandom Page

Built using : *HTML/CSS, JavaScript* [Link](#)

Loso : Responsive Website of a Smartphone Brand

Built using : *HTML/CSS, Bootstrap, JavaScript, jQuery* [Link](#)

Blockchain Projects

Blockchain Based Decentralised Energy Using Hyperledger Fabric

Built using : IBM Blockchain Extension, Hyperledger Fabric, NodeJs, CouchDB, Docker, Minifab [Link](#)

Fruit Supply Chain Tracing App using Blockchain

Built using : IBM Blockchain Extension, Hyperledger Fabric, NodeJs, CouchDB, Docker, Minifab [Link](#)

Skills & Certifications

- **Frontend Development:** HTML, CSS, Bootstrap [Link](#) | JavaScript [Link](#) | TypeScript | Reactjs [Link](#) | | Material UI | Fabric.js
- **Backend & Programming:** Nodejs [Link](#)
- **Distributed Ledger (Blockchain) / Decentralised Storage:** Hyperledger Fabric [Link](#) | Hedera Hashgraph [Link](#) | IPFS (Pinata)
- **Databases & Tools:** MySQL | Redis | MySQL Workbench
- **Messaging & Streaming:** RabbitMQ
- **Testing & Code Quality:** Cypress [Link](#) | ESLint | Insomnia
- **DevOps & Infrastructure:** Docker | Microsoft Azure | Twingate | Grafana | Google Cloud [Link](#)
- **Version Control:** Git | GitHub Link [Link](#)
- **Tools & Technologies:** Unix Shell | JSDoc | Markdown
- **Platforms & Productivity:** Google Workspace | Microsoft Office Suite | Canva
- **Cloud IDE:** Replit [Link](#)
- **No-Code Development:** Google AppSheet [Link](#)

Academics

B.Tech: Computer Science Engineering | Year of Completion : 2023 | CGPA: 7.14

Soft Skills

Communication, Critical Thinking, Problem Solving, Adaptable, Time and Self Management, Conscientious, User Empathy, Design Empathy
